"BRYAN" A POLITICAL PORTRAIT By William Allen White

MR. WHITE has scrupulously avoided discussion of political issues, and in fact the introduction of any details which could not add to the vividness and reality of his picture. In a style alive with pointedness of epithet, the writer describes Bryan's private life, tells of the ambitions of his youth and early manhood, and outlines his political career. Mr. White, though he does not defend Bryan's cause, is cordially appreciative of some of his admirable qualities of personal character. The article contains a prophecy with regard to the consequences if Bryan were elected President.

Madre Mountains would be so great as to render the project entirely impracticable, As a result of operating no farther than Casas Grandes, the Rio Grande, Sierra Madre, and Pacific Railway has not paid interest on the investment, and only for little and only for lit Casas Grandes, the Rio Grande, Sierra Soader, and Pacific Railway has not paid interest on the investment, and only for little more than a year has it paid working expenses. The enterprise was fathered principally by the stockholders of the Corprincipally by the stockholders of the Corprincipal the Corprinci

Ariz. Modern furnaces have been estab-lished at a cost of more than \$1,900,000 it is said to be one of the finest and most It is said to be one of the mest and most leaborate copper-smelting plants in the world. It is claimed the company has \$35,000,000 worth of copper ore at Nacosari blocked out, or 'in sight,' as they express it. A railroad line has been surveyed from smetter is hauled from Bisbee to Nacosari in specially made freight wagons. Three of these wagons are coupled together and hold nearly two carloads of freight. They are drawn by eighteen horses or mules. Coal costs this company more than the death of the carb of the coroner did not commit Engel on to be a question as to whether he can be tried on that charge, as he is now serving a sentence for an assault which has per ton laid down. supply or guarantee six or more cars of freight per day between Frontera and Cludad Jaurez (El Paso, Tex.) The company would thus save several dollars per ton on the coal it will use. Coal laid down in El Paso is \$4.50 to \$5 per ton. It is wine that at Bicket we it will be readily. twice that at Bisbee; so it will be readily seen what a saving the copper company could effect with railway connections at El Paso via the Rio Grande, Sierra Madre, and Pacific Railroad and its proposed extension, especially when it is understood that the copper special will need \$5.000 or \$1.000 or \$1.00

vestment from the first. General Manager Ramsey, who is an engineer as well as a practical railroad man, came to the conclusion, after his horseback survey, that the extension would not cost more. The first seventy or eighty miles of the extension would he laid at less than \$10,000 the mile. For that distance there would be few curves, practically no grading, and no cuts. It would cross a series of level cat-tle ranges. The line would then strike the rugged mountains of the Continental Di-vide. Mr. Ramsey, after several days' searching, found that two tunnels and a with a considerable number of cuts and fills-altogether about thirty-

and South America generally. Only a commercial footing and South America generally. Only a commercial footing.

"The coffee crop for this season is estimated, by both Government and planter, at fully 156,006 bags, as against 75,000 bags for the last season; the export duty on which will amount to 300,000 pesos, or sufficient to pay the interest on the foreign debt of \$1,409,000 and leave a handsome the more stable products of the United the more stable products of the United States. There is, however, a fair proportion of the population not only capable

expenses. The enterprise was fathered principally by the stockholders of the Corrallitos Company, a New York corporation possessing a well-stocked cattle ranch of 1,000,000 acres and several very good lead and silver mines. The road placed the Corrallitos mines and ranch in touch with the markets, and the company expected to haul enough freight to pay interest on the railroad stock and bonds, in addition to the cattle and ores carried from the Corrallitos property. This was expected, whether or not the road was ultimately extended to the Gulf of California.

"Realizing that the railroad as now operated will not pay, the company is considering an extension westward in one of two directions, possibly both.

"The Copper Queen Company, of Arizona, has just completed a copper-smelting plant at Nacosari, State of Sonora, about one hundred miles south of Bisbee, Ariz.
